

ZM Financial Systems is seeking a CECL Software Product Manager in our Cary, N.C. headquarters. Our solutions provide risk analytics, asset/liability management and pre-trade analytics to some of the world's largest and most sophisticated financial institutions. The CECL Software Product Manager will be responsible for building out our CECL Solutions Software Group. This position will be specifically dedicated to redesigning our cash flow engine and ALM model to be a turn-key CECL solution for financial institutions.

The ideal applicant for the CECL Software Product Manager position must have 5+ years in one of the following capacities:

- Worked in a bank responsible for preparing or managing existing ALLL calculations
- Worked at a national CPA firm responsible for auditing the ALLL calculations of financial institutions
- Worked at a nationally-known ALLL consulting firm and responsible for preparing ALLL calculations

Additional requirements include:

- Bachelor's degree in related discipline
- Outstanding verbal and written communications skills
- Well-organized self-starter, able to handle multiple tasks with minimal oversight

Benefits:

- Competitive Salary
- 401k plus company matching
- Company paid medical, dental and vision insurance

Submission:

- Please send cover letter and resume directly to: allyson.beback@zmf.com
- Solicitations from third-party recruiters not accepted
